

199 SERIES CORNERS PROFILED

Designed to be used with either hardboard, fiber cement or wood siding. The 199 Series Corners are manufactured with a full wraparound lower lip requiring no bottom nail. Manufactured in smooth or wood grain textured. 0.015 aluminum, the outside is primed and ready to paint. The inside is coated with an epoxy backer to prevent any corrosion. The corners come in a wide variety of lengths and return sizes to fit most available hardboard or cement fiber plank siding, including many of the profiled 12" and 16" shapes. Face width per side at the bottom 1-3/4", tapering to 1-1/4" at the top.

Packaging – 100/CTN.

Profiled 199 Series Corners available for: Surelock, Weyerhaeuser.
